Weather tracking app

Dec | 15 | 11 by: Bruce Smith

Professional weather tracking app; WeatherTrack let's you see what the experts see on your cell phone

If you are a professional contractor where weather plays a critical role in your work, a new cell phone app can keep you on top of what's happening locally, state-wide, or nationally with the touch of the screen.

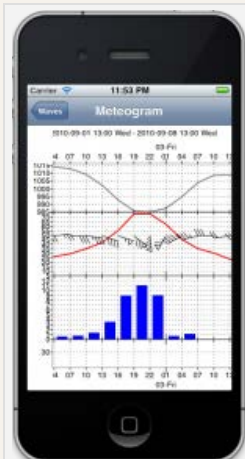

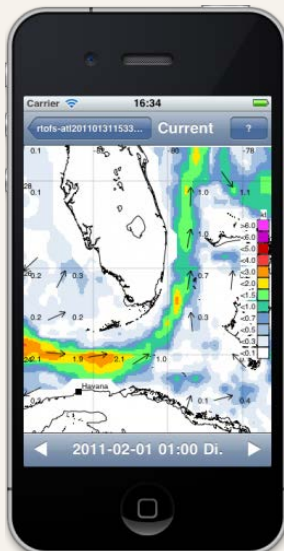

WeatherTrack, the Swiss Army Knife for weather enthusiasts, delivers accurate, reliable and user friendly data for any given location world-wide.

Think of WeatherTrack as your own private meteorologist; always there, always ready.

It allows you to download a **GRIB** file for any given area worldwide, thus getting precise information about wind, waves, currents as well as precipitation, pressures, geopotential height, sea/air temperature and more. Severe weather warnings are displayed.

It is the only app that offers a choice of different weather models and can access e.g. the **RTOFS model** of Atlantic Ocean currents with surface temperatures and salinity.

Weather forecasts can be displayed as satellite, radar or telefax pictures.

User-friendly WeatherTrack gives the cell phone user immediate weather data in different formats.

WeatherTrack is available in several languages and can be downloaded from the iTunes app store – with full information also at <http://www.weathertrack.us>. Special Xmas season price: \$9.99 (Reg. \$19.99).
